

The Cozero impact

Efficient emission accounting, reduction, and reporting

Save time, reduce risks, improve sustainability efforts, and increase competitiveness with Cozero's carbon management platform.

Save time

Say goodbye to tedious manual data collection and analysis. Our platform streamlines climate data management and GHG-aligned accounting across scopes 1-3 so you can efficiently report your footprint.

Reduced data collection time: Onboard collaborators to the platform, request activity data from business units in a click, or import activity data in bulk.

Emissions calculation automation: Save time with automated carbon calculations and a database of over 40,000 emission factors.

Supplier data collection: Collect Scope 3 emissions data from suppliers directly, avoiding manual data compilation from various sources.

Better decision-making: Use dashboards and built-in analytics for faster insights, allowing for quicker decisions on climate impact.

Reduce risk

Avoid the pitfalls of poor data and low transparency. With Cozero's reporting tools, you can confidently manage the complexities of climate reporting and meet your sustainability and compliance goals.

High data integrity: Use GHG Protocol-aligned carbon accounting to enhance data quality and ensure comprehensive Scope 1-3 reporting by filling in gaps.

Transparent methodology: Gain clear insight into emissions calculation methods, building stakeholder trust through enhanced visibility.

Scientific standards: Ensure accuracy and credibility with carbon accounting that adheres to rigorous scientific calculation protocols.

Regulatory compliance: Share reports that meet local and international regulations, such as CSRD or CBAM, reducing non-compliance risks.

Improve climate efforts

Elevate your sustainability efforts to new heights with comprehensive and granular data across Scope 1-3 and actionable climate strategies.

Quality reporting: Create detailed emissions reports with precise carbon footprint measurements across business units.

Emission forecasting: Predict future emissions to support strategic sustainability planning.

Emission reduction: Use custom insights to identify effective decarbonization strategies for your enterprise.

Sustainable decision-making: Use data-driven insights to align sustainability with business goals.

Competitive edge

Gain a competitive edge by integrating sustainability with your business strategy, boosting stakeholder trust, operational efficiency, and innovation in green products.

Cost measurement: Combine financial analysis with sustainability to uncover cost-saving opportunities and boost operational performance.

Brand reputation: Enhance brand image and public trust through transparent reporting and proactive carbon reduction.

Product Carbon Footprints (PCF): Become a market leader by tracking PCF and creating opportunities for eco-friendly products.

Stakeholder engagement: Open new collaboration and investment avenues with investors and suppliers through transparent communication.

About Cozero

Founded in 2020 and headquartered in Berlin, Cozero provides an end-to-end carbon management software solution for enterprises. With over 65 customers and a win at the German Sustainability Awards, Cozero's solution contributes to a low-carbon economy and helps companies decarbonize efficiently.
